HEBRON N. DAKOTA

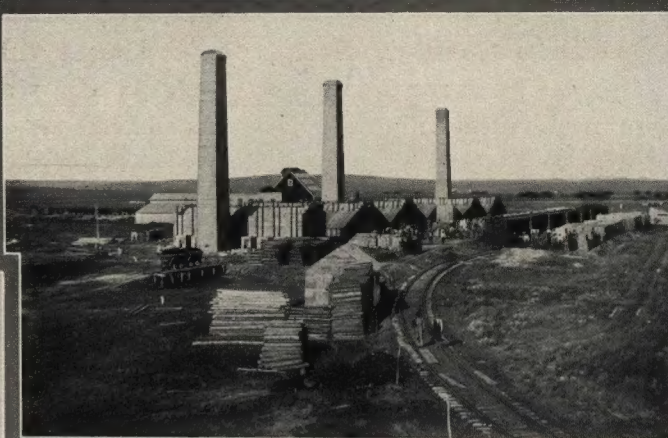

Clay Bank, Hebron Fire & Pressed Brick Co.

Clay Bank and Coal Mine, Hebron Fire & Pressed Brick Co.

Yard in 1908.

Yard in 1909.

Introduction

IN presenting this illustrated pamphlet we wish to thank our many friends for the liberal patronage bestowed upon us in the past. Prospective customers we invite to give our product a kind consideration before placing orders.

The superior excellence found in Hebron Brick is due—First, to the unsurpassed, high quality of raw material entering into the product. Second, a most modern and up-to-date equipment. Third, the appliance of expert supervision of work with the result that today Hebron Brick is used in the most prominent and best buildings over the entire Northwest, Pacific Coast and Canada. They have become the favorite among Architects and Builders. Cognizant of the quality and beauty of our product the United States Government has also given our brick due recognition.

The strong and most important points in favor of Hebron Brick are, their origin from the very best and finest fireclays in the world, noted for their purity and uniformity of composition which insures a product of absolute even size, texture and proper density. No time is to be wasted in sizing brick.

The various shades are superb and by proper combination effects can be produced that will appeal to the artistic and aesthetic sense of the Architect and Builder.

On account of the brick being burned to semi-vitrification it is impossible that disintegration can ever take place and thus will absolutely resist the elements of northern climes.

How well the Hebron Brick were received since manufacturing began, the following table will be of interest:

<i>Sold, 1905</i>	-	-	-	332,494
" 1906	-	-	-	1,065,395
" 1907	-	-	-	2,063,446
" 1908	-	-	-	2,393,054
" 1909	-	-	-	3,650,397

The improvements and additions for 1910 will increase our capacity to about 10,000,000 brick annually.

Of the buildings not illustrated in the following pages we may also mention: High School at Helena, Mont., Jail Building at Butte, Mont., City Hall and Elk Building at Jamestown, N. D., Hibbing Hotel, Hibbing, Minn., Northern Pacific Depot at Staples and Detroit, Minn., Northern Pacific Depot at Lewiston, Idaho, Opera House at Lethbridge, B. C., Masonic Temple at Billings, Mont., each one a testimonial of the merits of Hebron Brick.
